

Dhruv Rastogi

Backend Engineer · JVM · Cloud · Distributed Systems

dhruvrastogi2004@gmail.com · dhruvrastogi.me · linkedin.com/in/dhruv-rastogi-3b744032b · github.com/dhruv-15-03 · LeetCode Knight (1,000+ solved)

SUMMARY

Backend engineer, around 15 months in across an internship, a contract, and a current full-time role. Mostly Java + Spring on Azure, with Python on the ETL side. Shipped two open-source projects: DhrLang (a statically-typed JVM language I wrote end to end, v3.0.0, three execution backends, 1,000+ tests in CI) and boot-usage (an Apache-2.0 Spring Boot starter). At MAQ Software now, on the 500K+ records/day Azure pipelines and the reliability work for the 99.9% SLA tier.

EXPERIENCE

Associate Software Engineer · MAQ Software

Nov 2025 – Present · India

Java · Python · Azure Fabric · Databricks · Azure Functions · Terraform · Azure DevOps

- Run the ETL pipelines on Azure Fabric and Databricks that move 500,000+ records a day at 99.5% accuracy. Manual data-prep down ~60%.
- Own the CI/CD for 10+ Azure Function Apps (Azure DevOps + Terraform). Zero-downtime releases, deploys roughly 40% faster.
- Tightening alerting, monitoring, and reliability tuning on the 99.9% uptime SLA systems.

Associate Software Engineer (Contract) · RecruitCRM

Aug 2025 – Oct 2025 · Remote

Java · Spring Boot · MySQL · REST · Vue.js · RBAC

- Shipped 8+ REST APIs for CRM workflows, lead enrichment, and live data access. 85% test coverage on the new code.
- Added authentication and role-based access control across the backend.
- Cut API response times by 30% through query and execution-path cleanup.

Software Engineer Intern · CEERAS

Feb 2025 – Jun 2025 · Remote

Java · Microservices · Docker · Kubernetes · Redis · GitHub Actions

- Built the distributed bidding system that handles 10,000+ transactions a day at sub-second latency.
- Added async processing and a Redis cache layer to lift end-to-end throughput.
- Set up the Docker, Kubernetes, and GitHub Actions pipeline for build, test, and deploy.

OPEN SOURCE & SYSTEMS

DhrLang · statically-typed JVM language (v3.0.0)

github.com/dhruv-15-03/DhrLang

Lexer, parser, type checker, IR lowering, and three execution backends (AST interpreter, IR VM, JVM bytecode). JVM compiler target for smart contracts. LSP server with JSON diagnostics and a published VS Code extension. 14 releases. 1,000+ tests in CI with Jacoco coverage and PIT mutation testing.

boot-usage · Spring Boot Actuator starter (Apache-2.0)

github.com/dhruv-15-03/boot-usage

Drop-in starter exposing Actuator endpoints for runtime dependency analysis. Published as a Java package.

AI-Court · RAG legal-assistance platform

github.com/dhruv-15-03/AI-CourtRoom

Two-tier RAG built on LangChain: Python ML/RAG core and a JavaScript app shell, deployed on Vercel. Every generated answer links back to the source documents it was retrieved from, so when the model is wrong you can see exactly where.

TECHNICAL SKILLS

Languages	Java (primary), Python, JavaScript / TypeScript, SQL, Bash
Backend	Spring Boot, REST, authentication, RBAC, async / queue-based processing, microservices
Cloud & DevOps	Azure (Fabric, Functions, Databricks, DevOps), AWS basics, Terraform, Docker, Kubernetes, GitHub Actions
Data	MySQL, PostgreSQL, MongoDB, Redis, ETL
AI / ML	LLM application design, RAG with LangChain, citation-grounded response UX
Compilers / Tooling	Lexer / parser / IR / JVM bytecode generation (DhrLang), LSP, JSON diagnostics
Testing	JUnit, PIT mutation testing, Jacoco coverage

EDUCATION · CERTIFICATIONS · ACHIEVEMENTS

Education	B.Tech, CSE (AI Specialization), Dr. A.P.J. Abdul Kalam Technical University (AKTU), India. CGPA 8.5 / 10. Degree completes July 2026; working full-time in parallel.
Certifications	Microsoft: DevOps Engineer Expert (AZ-400) · Azure Developer (AZ-204) · SQL AI Developer · Fabric Analytics Engineer (DP-600). OCI 2025 Developer & DevOps Professional. MongoDB Java Developer. GitHub Copilot Certified.
Achievements	LeetCode Knight (1,000+ solved) · Smart India Hackathon 2024 Top 50 nationally · ISC Class XII 96.75%, Rank 1 on campus

Available in 2 weeks. Open to SDE-1, Backend, AI Systems, or Founding Engineer roles. Remote, hybrid, or relocation OK.
